

# TAGIFY

*by Tyson Bell and Megan Irving*

# So What Is Tagify?

- virtual graffiti app
- “tag” locations
- view and vote on nearby messages
- icon size changes
- messages vanish over time

# Technical Difficulties

- testing Google Maps on an emulator
- implementing the online server

# What Does The Future Hold?

## In Development:

- commenting on messages
- unread messages effect

## Stretch Goals:

- drawing graffiti
- augmented reality via Google Street View

Thank You
